

SUMMARY OF THE HOURLY TASK GUIDELINES WORKGROUP

Organizer: CDSS Adult Programs, Quality Assurance Bureau
Location: Health & Human Services Data Center, 9323 Tech Center Drive,
Conference Room 2, Sacramento, California
Date: September 23, 2005
Time: 10:00 a.m. to 1:00 p.m.

The meeting was attended by consumers, providers, various state and county staff, advocacy groups, public authority representatives, and union representatives in person and via teleconference. Attendees signed in and received the following handouts: An Agenda; Time Per Task Guidelines Exception Preliminary Draft Regulation Language; CDSS Focus Group data; CMIPS Summary Data; IHSS Data Summary Sheet; Homemaker County Authorization Data; Definition of the Task for Meal Cleanup; a copy of PowerPoint slides outlining the meeting goals; and PowerPoint slides entitled, "Making Sense of Time per Task Data."

Brian Koepp, Chief, Quality Assurance Bureau (QAB), commenced the meeting by welcoming attendees, making introductions, and providing the meeting objectives for the workgroup, which included a review of the data collected; a presentation by CSUS summarizing the data; a discussion on training/testing/applying the guidelines and exceptions thereto; monitoring the application of guidelines; and the goals for the next meeting.

Brian then reviewed the Time Per Task Guidelines Exception Preliminary Draft Regulation Language and a discussion ensued regarding the maximum number of service hours received under the waiver program and questions focusing on proper assessments.

Ernest Cowles, Ph.D., California State University, Sacramento, presented using PowerPoint slides entitled, "Making Sense of Time per Task Data." Dr. Cowles discussed and answered questions regarding using statistical methods and standard deviations for analyzing data in order to determine guideline ranges.

Some attendees expressed concerns about the data collected and wanted to see a comparison of data using a "1 standard deviation" and "2 standard deviation" methodology. It was agreed that CDSS would provide a comparison of the two standard deviation findings prior to and at the next scheduled meeting. A question was also raised concerning the Washington State Residential Care Time Study report and the applicability of its findings to California. This report will be provided to all workgroup members and its finding will also be discussed at the next scheduled meeting.

Eva Lopez, Chief, Adult Programs Branch, commented on our data stating that these are our data sources, and we have to work with the data we have to determine a range for guidelines. She acknowledged that there will be exceptions to these guidelines and that the focus is on the individual consumer.

Martha Bracha, Manager, QA Operations Unit, discussed the sample worksheet entitled, "Meal Cleanup - Definition of the Task" and proposed to use it as a model for all

nine tasks we are defining. Attendees requested the worksheets for all nine tasks identified as needing guidelines, and CDSS agreed to provide these at the next meeting.

Brian closed the meeting thanking attendees for their valuable input and stated that data will be forwarded to attendees for review prior to the next meeting on October 6, 2005.

**HOURLY TASK GUIDELINES WORKGROUP
ATTENDEES AT THE 9/23/05 MEETING**

Name	Organization
Eva Lopez	CDSS
Brian Koepp	CDSS
Andrea Allgood	CDSS
Bea Sanchez	CDSS

Jovan Agee	UDW
Fay Mikiska	Sacramento Co. IHSS Adv. Comm.

TIME PER TASK GUIDELINES EXCEPTION

PRELIMINARY DRAFT REGULATION LANGUAGE

Upon completion of a face-to-face individual needs assessment by a designated county social services staff person, exceptions to time per task guidelines shall be permitted when necessary to enable the recipient to establish and maintain an independent living arrangement and/or remain safely in his/her home or abode of his/her choosing.

Whenever task times outside (above or below) the range provided by guidelines are assessed, the county shall document the need for the assessed service level in the case file.

Any exceptions to the time per task guidelines will be subject to the limits imposed by Welfare & Institutions Code Section 12303.4 which states:

(a) Any aged, blind, or disabled individual who is eligible for assistance under this chapter or Chapter 4 (commencing with Section 12500), and who is not described in Section 12304, shall receive services under this article which do not exceed the maximum of 195 hours per month.

(b) Any aged, blind, or disabled individual who is eligible for assistance under this chapter or Chapter 4 (commencing with Section 12500), who is in need, as determined by the county welfare department, of at least 20 hours per week of the services defined in Section 12304, shall be eligible to receive services under this article, the total of which shall not exceed a maximum of 283 hours per month.

CDSS Focus Group - Fresno Data (Seniors)

55 Consumers Reported	Stated Hours Worked	Authorized Hours Worked
Cooking	3.97	7.34
Meal Cleanup	3.08	2.85
Bathing	2.97	3.09
Dressing	3.47	1.97
Ambulation	5.59	2.22
Transfer	2.76	2.2
Bowel and Bladder	7.85	3.33
Feeding	3.58	2.91

CDSS Focus Group - San Diego Data (Seniors)

28 Consumers Reported	Stated Hours Worked	Authorized Hours Worked
Cooking	6.59	6.06
Meal Cleanup	5.22	1.56
Bathing	3.47	2.42
Dressing	6.73	1.59
Ambulation	7.98	1.42

MEAL CLEANUP

Definition of the Task

Meal Cleanup: Washing, drying, and putting away dishes and pots and pans, putting leftover food away; and washing/drying hands.

Note: This does not include the cleaning of the refrigerator, oven, or stove as these IHSS services are authorized under domestic services.

Range	
-------	--

Things to consider for all:

- What recipient is able to do (Functional Index (FI) ranking). Example: recipient with a FI rank of 3 can wash breakfast and lunch dishes and utensils, and needs provider to clean up after dinner only.
- Types of meals, i.e. cleanup of breakfast dishes for recipient who has only toast and coffee versus recipient who has eggs and bacon.
- How frequently meal cleanup is performed, i.e. one time per day versus three times per day.
- How often the provider provides services, i.e. 7 days per day versus 3 days per week.
- Availability of dishwasher

Other things to consider:

More or less time may be assessed if: *(Examples of Exceptions)*

- Recipient must eat frequent meals which require additional time for preparation and clean up.
- Recipient does not eat breakfast and eats main meal at noon with a light meal for a snack at night which does not require meal cleanup.

Hourly Task Guidelines

Goals and Accomplishments

California Department of Social Services
September 2005

Data Evaluation

- Input from program stakeholders has been obtained through the 5 Hourly Task Guidelines Workgroup meetings completed to date.

Other Data Sources

- CDSS Focus Groups with Consumers/Providers in San Diego and Fresno
- CSUS Focus Groups with Consumers/Providers
- CMIPS Data

Other Data (Continued)

- CDSS/CAPA SURVEY
- Homemaker Data
- Information From Other States

Summarizing Data

- CSUS will be presenting information today about how CDSS and CSUS summarized the available data.

Training Staff In The Use of Guidelines

- It is CDSS' goal that all staff performing assessments will receive training in the application of guidelines through the IHSS Training Academy.

Testing Guidelines

- CDSS has agreed to a field test of hourly task guidelines after normal ranges have been established.
- Field testing will be done concurrently with the regulation process.

Exceptions

- Upon completion of a face-to-face individual needs assessment by a designated county social services staff person, exceptions to time per task guidelines shall be permitted when necessary to enable the recipient to establish and maintain an independent living arrangement and/or remain safely in his/her home or abode of his/her choosing.

Exceptions (Continued)

- Whenever task times outside (above or below) the range provided by guidelines are assessed, the county shall document the need for the assessed service level in the case file.

Exceptions (Continued)

- It is unlikely that any list of exceptions will be able to address all possible exceptions
- Therefore, any lists developed will include language to indicate that the list is merely illustrative, and not exhaustive.

How Guidelines are Applied

- County staff ask appropriate questions to determine need using guidelines as a reference point.
- County staff determine, after asking appropriate questions, if an exception to guidelines is required.

How Guidelines are Applied (Continued)

- If exception indicated, county staff document reason for exception in case file.

Questions/Considerations

- What consumer can do
- Tasks that consumer needs help with
- Frequency – times per day/week
- Amount of time it takes each time

Checks and Balances

- County and State QA staff will monitor application of guidelines through review of case files and home visits.
- County and State QA staff will monitor statistics.

Checks and Balances (Continued)

- Review of fair hearing decisions

Next Steps

- Using summarized data, apply normal ranges to service categories.
- Complete Worksheets for each service category for which guidelines are being developed.

Next Steps (Continued)

- Today, we will apply the summarized data for Meal Clean-up to the worksheet and discuss some of the specific issues that may apply to Meal Clean-up and when exceptions may be indicated.

CSUS PRESENTATION

Next Meeting Goals

- After the process of using summarized data to develop normal ranges has been agreed upon, CDSS will apply data (using worksheets) to all categories for which guidelines are being developed.
- Data will be sent to workgroup members for review and comment prior to next workgroup meeting.

Making Sense of Time per Task Data

Ernest L. Cowles, Ph.D.
Institute for Social Research
California State University, Sacramento

Individual vs. Group Data

- Individual data such as the amount of time that it takes for an IHSS recipient to take a bath must be combined in some way with the information from other individuals to get meaning information about how much time should be allocated to cover a group of recipients.

Common Measures of “Central Tendency”

- Mean – The arithmetic average: The sum of the individual values on some measure divided by the number of individuals.
- Mode – The most frequently appearing value on some measure, among a group of individuals
- Median – The midpoint in a range of values on some measure, among a group of individuals

How different “averages” provide different results
